

This automatic battery charger can charge lead-acid, GEL, EFB and AGM 6/12V batteries on light, commercial, agricultural and construction vehicles.

- Automatic charger, without monitoring
- Charge without disconnecting the battery
- 2 charging speeds
- 3 LEDs: mains, charging, charged

- Copper coil
- 1.5m charging cables
- 1.3m mains cable

TECHNOLOGY

- Charges 20 to 180Ah lead-acid, GEL, EFB and AGM batteries to a 100% (WUoU curve)

GENERAL PROTECTION

- Thermal protection of the transformer.
- Protects vehicle electronics.
- Protection against reversed polarity via a frontal 20A fuse.
- Fully insulated clamps to prevent sparks.
- Metal casing.
