

PROGYS 220E FV CEL

The MMA welding station for professionals!

www.gys.fr

4 welding modes

- MMA
- MMA Pulse
- TIG Lift DC
- TIG Lift Pulse

A wide choice of electrodes

Basic, rutile and cellulosic
up to Ø 5 mm

Intuitive user interface

- V/I display during and after welding
- Adjustable Hot Start and Arc Force functions
- Storage of 10 programs by process
- Remote control

Robust and compact

- Reinforced body and IP 23
- Easily transportable

Secure

- VRD (Voltage Reduction Device)
- Lockable keyboard

Made in France

- Welding current adjustable from **5 to 220 A**
- High duty cycle from **160 A to 60%**.
- Designed for electrodes from **Ø 1.6 to 5 mm**
- Welding thickness **up to 5 mm**
- High-tech power supply: PFC technology and FV (Flexible Voltage)
